Tax # Bus Reg #: PMBR.03620

Description	Total
-------------	-------

Whitings Pond - 2026 Management Program	\$1,420.00
---	------------

Upon contract approval, Water & Wetland will prepare and file the required State Pesticide Use Permit (WM04) with Massachusetts Department of Environmental Protection (MA-DEP). The permit application will include all required forms, project information, herbicide information and use rates, and maps. The issued permits will be provided to North Attleboro Conservation no less than 48 hours prior to treatment, as required within the Orders of Conditions. (\$220)

In May, a Water & Wetland Aquatic Biologist or Environmental Scientist will conduct a survey of Whitings Pond. The survey will be performed from a motored boat and will include visual observation paired with the use of a standard throw-rake. The survey will be used to confirm locations of invasive and nuisance native plant growth and/or algae. This data will be used to confirm not only treatment locations, but also treatment timing. (\$300)

In June, a Water & Wetland Aquatic Biologist or Environmental Scientist will conduct a second survey of Whitings Pond. The survey will be performed from a motored boat and will include visual observation paired with the use of a standard throw-rake. The survey will be used to confirm locations of invasive and nuisance native plant growth and/or algae. This data will be used to confirm not only treatment locations, but also treatment timing. (\$300)

In July, a Water & Wetland Aquatic Biologist or Environmental Scientist will conduct a third survey of Whitings Pond. The survey will be performed from a motored boat and will include visual observation paired with the use of a standard throw-rake. The survey will be used to confirm locations of invasive and nuisance native plant growth and/or algae. This data will be used to confirm not only treatment locations, but also treatment timing. (\$300)

In August/September, a Water & Wetland biologist will return to Whittings Pond to conduct a post-treatment survey. The survey will include visual observation and the use of a standard throw-rake. Information collected during the survey will be used to document 2026 management efficacy and to guide 2027 management. (\$300)

Following each visit to the pond, Water & Wetland will provide the Conservation Commission with a field notes summary. Our exclusive field notes provide information pertaining to the visit including: a summary of pond conditions and the work performed, any recommendations, photos, and basic water quality such as Secchi disk clarity, temperature, and dissolved oxygen. Field notes are typically provided within two business days of the visit but many times are provided the same day or next day. (No Charge)

In December, Water & Wetland will provide North Attleboro Conservation Commission with a year-end summary report which includes a summary of all work performed during the 2026 season, including photos. Recommendations for the 2027 season will be included within the year-end summary report. (No Charge)

**In the event of an algae bloom in Whittings Pond, Water & Wetland commits to a timely response to a request for an algaecide treatment. Algaecide treatments are not included in the base contract price; however, if requested, Water & Wetland will apply copper sulfate to 1/2 of Whittings Pond for a cost of \$2,045. EarthTec algaecide may also be applied to 1/2 of Whittings Pond as requested. EarthTec tends to provide longer lasting results as it stays in solution for a longer period of time than traditional copper sulfate. The cost for each 1/2 lake EarthTec treatment at Whittings Pond is \$2,675.

**We recommend that all invasive aquatic plant management be based on the two surveys performed during the growing season. If necessary/approved by the Town of North Attleboro, Water & Wetland will apply diquat herbicide for the control of milfoil and/or brittle naiad for a cost of \$1,985 plus \$200 per acre treated.

Prior to any treatment, North Attleboro Conservation will be notified in writing (no less than 48 hours prior to treatment as required within the Orders of Conditions). Immediately prior to treatment, the shoreline will be posted with neon signs noting the treatment date, Water & Wetland contact information, and any water use restrictions.

Subtotal	\$1,420.00
Total	\$1,420.00

Payment Schedule

Due Upon Completion of May Survey (36.62%)	\$520.00
Due Upon Completion of June Survey (21.13%)	\$300.00
Due Upon Completion of July Survey (21.13%)	\$300.00
Due Upon Completion of Post-Management Survey (21.13%)	\$300.00

Notes:

*As-Needed algae and/or weed treatments will be invoiced upon completion if needed/requested. Additional/as-needed treatments can be approved in writing either via email, purchase order, or via a separate agreement.

- Water & Wetland encourages timely permitting to avoid delays in management. For this reason, we respectfully ask that this proposal be signed and returned within 30 days following the date of this proposal. Following this date, Water & Wetland reserves the right to review program scope and pricing.

Special Requests:

- 1) The Parties acknowledge that the existence and the terms of this Agreement and any oral or written information exchanged between the Parties in connection with the preparation and performance this Agreement are regarded as confidential information. Each Party shall maintain confidentiality of all such confidential information, and without obtaining the written consent of the other Party, it shall not disclose any relevant confidential information to any third parties, unless required by law.
- 2) Water & Wetland will maintain general liability insurance coverage for the entire term of this agreement. Certificates of Insurance are available upon request and we are more than happy to name the Customer as additional insured.
- 3) Unless otherwise specified in writing, all payments are due within thirty (30) days of receiving an invoice.
- 4) Any alteration or deviation from the provided scope of services that may involve extra costs will be executed only upon written change orders and will become an extra charge over the final contract price determined by mutual agreement between the parties
- 5) The provided pricing shall expire 30 days from the date submitted unless extended in writing by Water & Wetland.
- 6) Water & Wetland will not be held liable for delays that may be caused by weather, site conditions, or regulatory process. We are committed to timely filing of any necessary permits, as provided in the scope of services. The Customer understands that by signing, once filed the permit review process is solely dependent on the State or local municipality responsible for issuance.
- 7) Unless specified in the scope of services, all quotes provided include labor and materials, as well as any equipment necessary to complete the quoted project in a timely and safe manner.
- 8) The liability of Water & Wetland for any claims arising out of this Agreement, regardless of the form of action, shall not exceed the amount paid by the Customer to Water & Wetland under this Agreement, unless otherwise agreed upon in writing by both parties.
- 9) In the event legal action is required to enforce payment, the Customer will be responsible for all attorney fees and any court costs incurred in bringing legal action and/or enforcing any judgment granted therein, plus interest at the legal rate from the date of accrual of such fees and costs. All of which shall be deemed to have accrued upon the commencement of such action and shall be paid whether or not such action is prosecuted to judgment. Any judgment or order entered in such action shall contain a specific provision providing for the recovery of attorney fees and costs incurred in enforcing such judgment.
- 10) By signing, the Customer understands that some products that may be used hold restrictions on irrigation. It is the Customer's responsibility to notify Water & Wetland of any irrigation uses of the pond or lake.

11) Herbicides and algaecides used by Water & Wetland are both EPA and State approved. Although there is no direct toxicity to fish and wildlife, the Customer understands that fish kills can occur naturally due to lack of dissolved oxygen, spawning stress, or otherwise. In this case, Water & Wetland shall not be held responsible.
