# APPENDIX D: NARRATIVE DESCRIPTION

# NARRATIVE DESCRIPTION

## Introduction

This Notice of Intent proposes a dock retrofit, stair repair, removal of trees, and planting of new trees at 306 Mount Hope Street in North Attleboro, MA.

## Existing Conditions

The existing 1.1 acre site is developed with a single-family dwelling along Falls Pond.

## Resource Areas

Falls pond borders the site to the west. Associated with Falls Pond are a variety of Resource Areas listed below that have been identified by a wetland scientist, whose report is included as Appendix G:

- Land Under Waterways: This resource area lies under Falls pond and is proposed to be disturbed by the dock retrofit supports.
- Bank: This resource area lies along Falls pond and is proposed to be disturbed only where the dock meets the land.
- Bordering Land Subject to Flooding (B.L.S.F.): This resource area includes all land below elevation 175.0 (NGVD29) datum. None of the proposed work will increase or decrease flood storage within the B.L.S.F.

## Proposed Work

### Great Pond

Falls pond is larger than 10 acres and is therefore classified as a "Great Pond" and is subject to 310 CMR 9. Permitting for small structures (such as docks) accessory to residences is administered by the Town of North Attleboro (Pond Permit, see below).

### Bordering Land Subject to Flooding (BLSF)

The dock is located within a BLSF area elevation 175.0. In the existing condition, the dock is secured to the bank by hinges while the rest of the dock floats on the water. When the pond level rises, the end of the dock floats up while the secured end is submerged. In the proposed condition, the entire dock will be fixed on metal posts out of the water, with the bottom half of the dock being located within the flood plain. This will not result in an increase or decrease in flood storage volume.

### Buffer Area

All land within 100' of wetland resource areas is subject to regulation.

# North Attleboro Wetlands Protection Bylaw

The Town of North Attleboro strongly encourages a 25-foot No Disturbance Zone (NDZ). The dock retrofit, stair repair, tree cutting, and planting take place within the NDZ. The areas proposed to be altered are existing degraded areas. No unaltered areas will be altered by the proposed activities.

The Town of North Attleboro administers a permitting program for docks on Falls Pond. The proposed dock retrofit complies with the Rules and Regulations Governing Structures on Falls and Whiting's Pond:

- Section 5 – Location and Design Guidelines
  - 5.1. Only one structure is located on the shoreline for this lot;
  - 5.2. The existing dock is neither perpendicular nor parallel to the shoreline. The proposed retrofit will bring the dock into compliance with this regulation to be perpendicular to the shoreline.
  - 5.3. The dock length is a modest 16' long, which allows for kayak boarding in sufficiently deep waters.
  - 5.4. The location where the dock connects to the bank is a frequently used pathway which is not used as habitat area.
  - 5.5. The dock is not composed of prohibited materials or treated with prohibited chemicals. The proposed pipe supports shall be galvanized aluminum.
  - 5.6. The existing dock is nonconforming in that it is both floating and affixed to the ground by hinges, making it impossible to remove during the winter months as required. The proposed retrofit will mount the dock on poles above the water level and will therefore not be required to be removed each winter.
  - 5.7. Wood preservatives will be applied to the dock no more than once per year.

## Project Schedule

The applicant intends to begin and complete all work during the spring and summer of 2026.

**Site Evaluation and Wetland Delineation  
306 Mount Hope Street  
North Attleboro, Massachusetts**

**Introduction**

AES conducted a site evaluation at the above referenced property on June 9, 2025. Wetland resource areas protectable under the *Massachusetts Wetlands Protection Act* (M.G.L. c. 131, s. 40) and the implementing *Regulations* (310 CMR 10.00) were identified and characterized. The top of Inland Bank/Mean Annual High-Water Boundary (MAHW) to *Falls Pond* was delineated in the field with red flagging tape. Resulting data describing the floristic, edaphic, and topographic characteristics of the property has been utilized in the preparation of this *Site Evaluation Report*. The following narrative provides a general site description, wetland delineation methodology, and wetland resource descriptions.

**General Site Description**

The subject property encompasses a residential lot located westerly of Mount Hope Street in North Attleboro, Massachusetts. Topography of site is generally flat. A single-family home with manicured lawn and scattered mature trees occupies the property. Residential development abuts the property to the north and south. *Falls Pond* lies to the west.

**Soils**

Soils underlying the site consist of well-drained, very stony Paxton (PaB, 306B), fine sandy loam, 0% to 8% slopes (USDA SCS 1978, Map #6, [www.nesoil.com](http://www.nesoil.com)).

**Wetland Resource Description**

Wetland resources associated with the site include Inland Bank. The banks of the pond are generally distinct and well defined and vegetated with upland and wetland vegetation.

*The top of Inland Bank/MAHW is delineated in the field with AES flagging stations #1 through #8.*

**FEMA Floodplain Designation**

Based on the *Federal Emergency Management Agency Flood Insurance Rate Map* for the Town of North Attleboro, Massachusetts (Map No. 25005C102G), the site is located within Zone X (non-shaded), *Areas determined to be outside the 0.2% annual chance floodplain* and *Zone AE; Special flood areas subject to inundation by the 1% annual*

*chance flood. Base flood elevations or depth determined.* The base flood elevation established for the site is 175 feet.

### **NHESP Estimated & Priority Habitat**

According to the Massachusetts *Natural Heritage and Endangered Species Program Habitat Map*, the site is not located within an Estimated Habitat of Rare Wildlife or a Priority Habitat of Rare Species.

### **Area of Critical Environmental Concern (ACEC)**

Based upon to the Massachusetts Geographic Systems *Area of Environmental Concern Map*, the site is not located within an ACEC.

### **Water Supply Protection Areas**

According to the Massachusetts Geographic Information Systems *Water Supply Protection Areas Map*, the site is not located within a Zone II groundwater recharge area or an Interim Wellhead Protection Area (IWPA).

### **Outstanding Resource Water (ORW)**

According to the Massachusetts Geographic Information Systems *Outstanding Resource Waters Map*, the site is not located within a contributing watershed to an ORW.

### **Buffer Zone**

Buffer Zone, as defined at 310 CMR 10.04, means:

*The area of land extending 100 feet horizontally outward from the boundary of any area specified in 310 CMR 10.02(1)(a).*

The Town of North Attleboro Conservation Commission maintains a 25-foot No Disturbance Buffer Zone Policy that must be included on all plans for work proposed within the Commission's jurisdiction.

The western portion of the site is contained within the regulatory Buffer Zone.
