

North Attleborough Opioid Task Force Update

The Three Pillars of the Town's Opioid Response Framework

- 1- Our goal is to get *left of bang*, we want to reach residents before an overdose ever occurs. This means focusing on prevention, early identification, and support systems that intervene long before crisis.
- 2 - During the overdose, our priority is saving lives as every second counts. Our coordinated response, Narcan access, data sharing, and compassionate care, turns every crisis into a chance for recovery.
- 3 - After the overdose, our mission is recovery and reintegration by helping residents rebuild their lives with dignity, stability, and hope. Every life saved is an opportunity for a new beginning.
