We can help you navigate enrollment in Medicare or get the insurance company on the phone to help resolve an unpaid bill. Members can always reach me or a member of our team when you need our help.

Launched earlier this year, the program uses advanced computer technology and a robust service support team to help retirees to self-manage and monitor their chronic conditions at home. The program has been expanded to provide for COVID-19 monitoring.

The innovative Ibis Program is provided in partnership with Senscio Systems, a Massachusetts-based telehealth services company. At present, the program is available free-of-charge to Medicare enrollees.
